EXPERIENCE

VALEO | TECHNICAL TRAINEE | JAVASCRIPT

July 2025 – Current | Prague

- Automated business correspondence workflows in Google Workspace with Apps Script (JavaScript), potentially saving teams up to **30 hours per month**.
- Collected and analyzed client requirements, translating them into **tailored applications** with clear technical and user documentation.
- Delivered guided walkthroughs for end-users and ensured smooth adoption of solutions.
- Maintain and improve deployed projects with **hundreds of active users**, ensuring reliability and scalability.

PROJECTS

FLIGHT LOG | GITLAB CI/CD | DOCKER | DEVOPS

2024 | FIT CTU

- Built a Java project with a full DevOps pipeline: implemented GitLab CI/CD to automate tests, builds, and Docker image creation. Used Ansible to provision environments on OpenStack and deploy the application from the GitLab Container Registry. The deployed container was accessible via VM IP, enabling seamless use of the app in the cloud.

FIT-EXCEL | C++

2024 | FIT CTU

- Developed a simplified Excel clone in C++ supporting data storage, formula parsing, and evaluation using an abstract syntax tree (AST) for performance. Added functionality to save/load tables in hexadecimal file format, enabling efficient persistence and recovery.

TMB – CITYSCAPE | PYTHON | TKINTER | PLANNING | PROJECT MANAGEMENT

2024 | FIT CTU

- Worked in a team to extend a thesis project deploying a Tactile Matrix Box (TMB) on campus. Designed a Python server with Tkinter for logic and visualization, processing data from camera-detected ArUcO cards and projecting results back onto the table. Contributed to planning, implementation, and testing.
- The project is now actively showcased at public school events (e.g., Night of Scientists), where children can explore it as a fun and educational experience.

GALACTIC SHIPPING COMPANY | ONTOUML | UML | BPMN | DEMO | OCD

2024 | FIT CTU

- A semester project simulating a galactic transport company. It addresses mission planning, cargo transport, and ship maintenance using ontological modeling, UML, processes, and transactions.

SKILLS

PROGRAMMING

Proficient: C++

Experienced: JavaScript • C • Python • L^AT_EX • HTML • CSS • PHP • SQL

Familiar: Java • Shell • Assembly • TypeScript • C#

LIBRARIES/Frameworks

Node.js • Symfony • Tkinter • STL

TOOLS/PLATFORMS

Git • GitLab • GitHub • DevOps • GanttProject • Docker • UML

EDUCATION

FACULTY OF INFORMATION TECHNOLOGY, CTU IN PRAGUE

BACHELOR'S DEGREE,
PROJECT MANAGEMENT
September 2022 - June 2025

MASTER'S DEGREE, WEB
ENGINEERING

September 2025 - Present (expected
graduation: 2027)

CERTIFICATES

ENGLISH

C1 Advanced – Cambridge English

Score: 200 Issued: Jan 2022
